Odyssey of Oddities Nov 13 2024

Season 4 Episode 11

Odyssey of Oddities Happened in the Future

Annie, Jake, Isaac, Wayon and other inhabitants of the crazy town gather around in the town's auditorium at the peak of day and the mayor gets on stage. The mayor said, "I am glad all of you can attend another legendary assembly done by your glorious mayor of this fully functioning town. The reason I called all of you here today is that you all share something in common. No kid is naturally bad. They can only be bad by their parents poorly conditioning them and failing to teach them to be decent citizens of society. It is something all of you have in common." The mayor points to Isaac and he said, "Isaac in this town was raised by a working class mother that rarely ever had time for him. It is why he had so much alone time and why he later studied to become the greatest right hand man any mayor could have." Isaac stands proud. The mayor points to Wayon and he said, "We know that Wayon is a criminal on his home planet of Eden Vern but he has come here and he has been really reliable at assisting me with taking justice towards the bad seeds we have living in this town. The bad seeds I am referring to are of course, Annie and Jake. Annie and Jake give the mayor dirty looks. The mayor points to Jake and he said, "Jake was raised by his overprotective mother and his father that was more of a friend to him than an actual father. Jake lacked a proper mother and father and they let him become a freak that would likely cause a major catastrophic disaster that could devastate the world." The mayor points to Annie and continues, "Annie here is even worse. Her parents are nothing but lazy slackers that never worked a day in their lives and they let Annie become a self entitled fool that she is." Jake stands up and raises a fist at the mayor and yells, "That's not true. That is nothing but a load of bull!" The mayor said, "Sit down Jake." Jake said, "Annie is my friend and I have known her for years. I know she is not a lazy slacker." The mayor said, "Sit down young man. Don't let me get Wayon to pound you into that seat." Wayon rubs his fist next to Jake. The mayor continues, "Annie is by far the reason why the government is more concerned about how parents raise their kids and the reason why new guidelines are being put in place. Let me show you the new PSAs they have on TV."

The mayor rolls down a screen and it shows footage of actors playing Annie and her parents. Annie looks dumb and a narrator said, "This is Annie. Annie's parents are lazy and they just let her have anything she would ever want." Annie's parents are shown to be lazy slackers that live in a messy house and they let Annie run around with explosive chemicals and Annie throws them out the window and it causes someone's house to explode into a mushroom cloud. Annie is shown launching a rocket and it crashes into a city and the city is engulfed into an explosion. The narrator continues, "Annie is a real person and her parents' poor parenting has caused her to become this criminal you see here. She is currently serving a prolonged sentence in a maximum security prison for something that is not her fault. It is all her parents. Her parents are still roaming freely when they are the real culprits behind this terrorist. Don't let your kids become like this. A message from the Council of Concerned Parenthood Consultants."

Annie said, “This is a load of bull. My parents are not lazy slackers that don’t contribute anything to society. I can prove it. They have made several contributions to the world of science and technology. I am sure there are books and records about it in the library.”

Annie and Jake go to the crazy town library and they go to the section on science and technology. They finds shelves of dusty books. Annie takes a book on science off the shelf and she blows on it and a cloud of dust forms off the book and it engulfs Jake. Annie said, “This looks like a book that has my parents’ achievements in it.” Annie and Jake go through the book and it shows science and technology people throughout history. They find a section showing Annie’s parents at some scientific machine. Annie said, “See. They are in this book and…” Annie keeps reading and a tear sheds from her eye. Annie said, “My parents are dead.” Jake said, “This must be a book made up by the mayor. It says they died in 2033. That is almost three decades into the future.” Annie said, “Perhaps this book is from the future. We know that time travel exists. Maybe there is something about them on the internet.”

Annie and Jake go to a computer in their residence and they look up Annie’s parents on the internet. The webpage shown looks just like the book. Annie said, “If this is a trick from the mayor, it looks like he hacked the internet to give us information from the future.” Jake said, “Yeah. He also changed the clock on our computer so it says it is May 16 2045.” Annie sees the clock on the computer says that date. Annie said, “You’re right. Something is going on.”

Annie and Jake go to the crazy town grocery store and Jake goes through soda cans and he looks at the dates on them. Jake said, “All of these sodas expire in 2046 or 2047.” Annie looks at milk and they all say they expire in May or June of 2045. Annie said, “This must be an elaborate prank from the mayor.” Jake spots TV entering the store with a TV stuck at the side of his head. Jake runs to TV and he said, “What date is it today?” TV said, “I am watching it on DDD News right now. It is currently May 16 2045.” Annie and Jake look at TV’s TV and they see a wrinkly old looking George Ferrier on the screen and he said, “I am George Ferrier of DDD News. I am officially retiring as of now. I have been in this news business for sixty years. Take over for me, Phil.” A young cool looking guy in a suit gets on the screen and he said, “So long George. In today’s news. A new technology institute built by the Annie Science and Technology Company is opening today in downtown San Francisco. It is made to honor Annie, the daughter of the couple that started this company. She was mysteriously lost several decades ago and this couple spent their last few decades alive grieving for the loss of Annie.”

Annie and Jake storm into the mayor’s office in the crazy town city hall and Annie said, “We know what you did.” The mayor said, “What is it this time? Is it that new cleanser that I put in the urinals? You have been putting up with my antics for longer than you think.” Annie said, “Cut the crap. We know you changed all the clocks in this crazy town so they will say it is 2045.” Jake said, “Yeah. You even made fake news reports on DDD News to cover this.” The mayor said, “I did none of this. This is only the natural passing of time that caused this. You have been in this crazy town for decades now. You have been here for so long that time itself doesn’t seem like anything anymore. I don’t even know why I still try to stop you from leaving this place. I won’t. I think you have served enough time in this crazy town. I think it is time you check out the outside world you missed out on for over forty years.” Jake said,

“You’re going to let us leave just like that?” The mayor said, “Well, if you leave, then you won’t be a pest to my plans anymore. You have been wanting to leave this crazy town for years now and I think it is about time that you finally got the one thing you wanted since before you first set foot in this insane asylum of a town.”

Annie and Jake walk out of city hall and Jake said, “Do you think this is another one of the mayor’s tricks?” Annie said, “Of course this is another trick from the mayor. He is obviously luring us into a trap. He probably has something set up for us at the front gate of this crazy town. I know how to avoid that.” Annie and Jake go to a hidden garage in their residence building. Jake’s eyes go big and he said, “What is this place?” Annie said, “This is a hidden garage. I wanted it to remain hidden so I told no one about it.” Annie pulls a sheet off something and it reveals a capsule with rocket boosters on it. Annie said, “This is yet another contraption I invented to get us out of this prison. Now may be the perfect time to test this.”

Annie and Jake take the contraption to the middle of a field of grass. Annie lights a match and she puts it to the boosters and they ignite. Annie and Jake get into the capsule and they are launched into the sky. Annie controls the capsule and it flies away from the crazy town and it heads into the civilization outside of the town. Annie controls the capsule while Jake looks down and sees nothing. The ground begins to materialize and buildings start to form into focus. The capsule begins zipping downwards and it crashes into a street and Annie and Jake go flying out of the capsule and they roll onto the road. A sleek futuristic car honks at Annie and Jake and it swerves around and crashes into a building. Another car darts quickly down the road and it almost hits Jake and misses him by a thin margin.

Annie and Jake jump off the road and they mindlessly run away and they plummet on the front walkway of a banking firm. A buff rugged security agent looks at them and said, “Get off our property now before I call the authorities.” Annie said, “We are lost. We have no idea where we are and…” The guard said, “Don’t give me that crap. I saw what you did right there. You are trespassing on this property.” A thin metallic black and silver robot with a dual-bladed glowing red sword shows up and said, “Is there a problem here?” The guard points to Annie and Jake and he said, “These crooks are stirring up trouble again.” The metallic assassin robot gives a stern villainous look to Annie and Jake and he swings and jabs his blade at Annie and Jake. Annie and Jake run through the city and they attempt to blend into a crowd of people walking on the street. The assassin robot uses his red vision and he ends up targeting Annie and Jake in the crowd of people. The robot jumps for them and Annie and Jake see he is heading for them. They run down the street and Jake points to something and said, “Is that a statue of you?” Annie sees the statue and she said, “That is me. That must be that Annie Institute we saw on the news.” Annie and Jake run for the statue and they run into the Annie Institute where they are in a wide open foyer. The robot cuts down the glass doors to the front of the institute and he continues to beeline to Annie and Jake.

Annie and Jake run some more and they look behind them and the robot stretches out his arms and he makes the blade barely singe Annie’s back. Annie and Jake have their eyes fixed on the robot assassin behind them and they crash into Isaac and Wayon. Isaac said, “Annie. What are you running from this time? Is it your own conscience?” Annie points her thumb behind her and said, “It is that thing.” The assassin looks down on them with Isaac and Wayon. Isaac grabs Annie and Jake and places them in front of him and he said, “They’re the ones you want. Not me.” Isaac pushes them into the assassin bot. The

assassin said, “Target affirmative.” He is about to strike a mighty blow towards Annie and Jake and a diamond gem hits the robot’s back and he gets cracked and falls apart. The diamond gem flies into Admiral Lightning’s grip. Admiral Lightning said, “These new assassin machines. They may be deadly fighters but one thing they are not is durable.”

Annie said, “Admiral Lightning. We are glad to see you. How did you get here and what is this place?” Admiral Lightning said, “Beats me. I was just going by to the crazy town to visit you and I ran into this place. I have been wandering around this new city for days and it is an endless labyrinth that leads to nowhere.” Isaac goes to his communicator watch and he said, “Mayor. We have Annie and Jake. It looks like they were really scared with your new assassin bots and…” Isaac notices the screen on his watch is indicating that there is no signal. Isaac said, “Damn. This stupid watch was working fine the other day when I tested it with this place.” Jake said, “You tested this watch here before?” Annie said, “That means you must have been here before.” Isaac said, “Well… fine… you caught me. I did come here a few days ago to test out this new city the mayor built as a trap for you.” Annie said, “I knew this was a trap.” Isaac said, “I was supposed to call the mayor with my watch but it does not seem to be working.” More assassin robots barge into the Annie institute and their target is Annie and Jake and they fire a barrage of dual bladed swords at them.

Admiral Lightning throws his diamond into all the assassin robots and they all crumble into piles of scrap metal. Admiral Lightning brings Annie and Jake to safety and Isaac and Wayon tag along. They run into a back alley. Annie said, “This is all a plot from the mayor. He changed all the clocks in the crazy town to say it is the year 2045. He even forged a book saying that may parents are dead.” Admiral Lightning said, “That mayor is just a crazy fool. He is more insane than any of the people that live in that cursed town.” Annie said, “Based on experiences I have had with time travel, I wonder if the mayor somehow found out how to travel in time and he sent us into the future. Knowing the mayor, he might not have a way for us to get back to the past. We are living in a future where we have nothing and we are wanted criminals for some stupid trespassing they think we did.” Admiral Lightning said, “Eh. This isn’t all bad. I always know I could come back home to my family afterwards regardless of what kinds of perils I experienced in my career as an action hero.” Annie said, “It was disturbing reading that my parents are dead. You must have been pretty sad when you found out your parents died.” Admiral Lightning stands like a broad chested hero and he said, “My parents never died.” Annie and Jake give Admiral Lightning a stern odd look. Jake said, “How old are you and how old are your parents?” Admiral Lightning said, “I lost count decades ago.”

An assassin robot enters a large red and black eerie throne filled with monitors showing footage of assassin robots delivering their version of justice all over the futuristic city. In a seat in the center of these monitors is someone dressed in a black and red costume with jagged sharp edges and thin beady triangular eyes. The assassin robot said, “Master, the interlopers Annie and Jake, have escaped our forces. They are teamed up with a powerful specimen that devastated our troops in one swift blow.” The master in the sharp costume said, “Send in our flying tanks armed with my latest state of the art heat-seeking missile technology.” The assassin said, “That would likely kill them.” The master said, “Not if you carefully aim your weapon properly. I must have Annie and Jake. I want to know all their secrets. That capsule we have from them doesn’t tell us everything.” The master points to the capsule that Annie and Jake used to get to this futuristic city.

Annie, Jake, Isaac, Wayon, and Admiral Lightning are in an alleyway that is dark and moist. Admiral Lightning sticks his head into the street and he sees assassin robots marching down the streets and patrolling every corner. Admiral Lightning said, “These things are really on to us.” Jake and Isaac look scared. Jake said, “What are we going to do about these things? They could kill us easy.” Admiral Lightning said, “These things may be deadly but they are pathetically weak. I am not scared of them.” Admiral Lightning walks into the street while throwing his diamond gem in the air and catching it. The assassins spot him and they start throwing their dual bladed swords at him. Admiral Lightning throws his gem and it pierces the heads of some of the assassins. More assassins run for Admiral Lightning and he jumps and punches it in the head leaving it shattered like glass. Assassins spot Annie and Jake and they creep up on them. Admiral Lightning throws his gem into that robot and it is left horribly deformed.

Admiral Lighting spots a ladder and he said, “Let’s climb on the roof. Trust me. I know what I’m doing.” Admiral Lightning climbs to the roofs while Annie, Jake, Isaac, and Wayon follow him. Admiral Lightning grabs onto Annie and Jake and he runs and leaps to different rooftops with them in his tight grips. Wayon grabs onto Isaac and runs and leaps with Admiral Lightning. Helicopters hover around the rooftops and they send missiles at Annie and Jake. Admiral Lightning throws his diamond gem into the missiles and they are destroyed. More helicopters are spawned and they crowd around the heroes forming a thick perimeter. More assassins pour out of the helicopters and they jump for Annie and Jake. Admiral Lightning punches one down and several of them jab their swords into him. Jake punches one of the robots and it makes his fist go large and swollen. The assassin robots capture Annie, Jake, Isaac, Wayon, and Admiral Lightning in the nets and they are brought into one of the helicopters.

The heroes are dumped in the large throne room where the evil master sits in his large chair and looks down on them. The evil master said, “Well Annie and Jake, it looks like you have found a way to master a form of time travel that only I am supposed to know about.” Annie said, “Time travel did not occur. It was one of the mayor’s pranks. We have no idea how we found this city of yours.” Jake said, “How did you end up targeting us specifically?” The evil master said, “Years ago, I discovered that there are several small wormholes in our world that serve as portals into different periods in history. These portals can be activated if you know precisely where they are and how to open them. They can be opened with chemical reactions that can be produced by high powered engines. I found how to find all these wormholes and I have traveled through them. Some of them took me back into the past while quite a few of them took me into the future. Before I knew it, I had a network of time portals that I used to go into the future and bring advanced technology from then back into the past. I introduced things into your time period that you were not supposed to have yet like communicator watches, high speed internet, digital video streaming websites, and even battle robots that pretty much every super villain in your universe has. Your parents found out about my plan and they tried to severe my operation. My operation is the reason why the technology scene has changed drastically in the last decade. Your parents tried to stop me so I had them executed.” Annie’s eyes go big and she raises a fist to the evil master, “At least our evil mayor has never murdered anyone before. That makes you worse than Mayor Fidelly Widely.” The evil master said, “You know Mayor Fidelly Widely?” Annie said, “He’s the mayor of the crazy town we have been trapped in for the past some few years.” Jake said, “That mayor has put us through all kinds of unspeakably evil plans.”

The evil master said, “I love that guy. I worship him like a god.” The evil master presses a button and a statue of the mayor of crazy town emerges from a panel in one of the floors. The evil master said, “I wish I could have met him. He had the best plan to capture all the crazy fools that would hinder my plot and have them live in crazy town. Thanks to his efforts, I now have a technological empire that has made me rich from all the products I have sold. I rule this city from this chair where I have access to every command this city has at my fingertips. No one has ever defeated me before. Tell me more about Fidelly Widely.” Annie pushes Isaac and Wayon in front of her and she said, “These guys closely work with him.” Isaac said, “The mayor is the best. He gave me this watch. He always lets us have the best new video games that have not even been released yet.” Isaac gives a stern look to Wayon. The evil master said, “Wouldn’t you like to be my right hand men?” Isaac said, “Of course we will. Our old master doesn’t seem to exist anymore.” Wayon said, “A new master is shrewd but he will get screwed.” Wayon picks up the dark evil master and throws him out the window leaving his command seat vacant. Isaac sits in the command chair and he said, “You will all be listening to me now. Annie, I want you to scrub my toes and rub my back.” Annie said, “I will never do anything for you.” Isaac said, “Wayon.” Wayon rubs his fist at Annie. Annie spots their capsule and said, “Run for the ship.” Annie and Jake run for their capsule and Admiral Lightning jumps on Wayon and wrestles with him.

Annie and Jake jump in the capsule and they activate it and it is sent flying out the window destroying the throne room. Admiral Lightning jumps and grabs onto the outer hull of the capsule. The capsule is freely flying away into the sky and a giant hand on a thick metal wire with sharp fingers jabs into the capsule. The hand rapidly brings the capsule into a field outside of the city where it crashes and is left destroyed. Annie, Jake, and Admiral Lightning stand up in the rainy field at night where they see the evil master is present. He said, “You didn’t think you would get away from me like that. You are the only real threat to me. I don’t care about those fricking fools, Isaac and Wayon. They will get ousted by my loyal citizens. It is you I want gone. You will end up in the same place as your parents…” A large futuristic blaster cannon fires out a wormhole and the evil master is sucked into the wormhole. Annie, Jake, and Admiral Lightning look at the person that fired the weapon and they see it is Annie’s parents. Annie said, “Mom… Dad?” Annie’s father said, “It is alright Annie.” Annie said, “I thought you were dead.” Annie’s mother said, “That’s what Milton wanted you to think.” Annie and Jake said, “Milton?” Annie’s mother said, “Milton was some nerd we got to help us get you out of that asylum you were detained at. He found out that we knew about these time wormholes so he turned against us. We hid in a period in history where we would be safe and we kept a constant watch. We tried looking for where you could be and we finally found you.” Annie said, “This is…” Annie hugs her parents. Jake said, “Do any of you know a way out of this futuristic crazy town? I don’t think any of us want to spend the rest of our lives in it.” Annie’s father said, “We know a wormhole that will take you back to the time period you belong at.” Annie’s mother said, “Don’t worry. We know most of the future. We know you will prevail against that villainous mayor at some point.”

Annie’s parents give Annie, Jake, and Admiral Lightning a map and they use it to find a wormhole and it takes them back to their period in history and back in crazy town. Jake said, “The future really is very hostile. I don’t think I will complain about this crazy town again anytime soon.”

Isaac sits on the throne and he plays around with the commands and he makes the city activate all kinds of zany functions that make the citizens of the city form an insurrection

against Isaac. Citizens barge into Isaac's office only to find him gone. Isaac and Wayon have escaped and they try to find different wormholes that takes them to different periods in history.

Admiral Lightning returns to his house and he enters in the front door and he said, "I'm home." An ancient looking lady comes to the door and she said, "Clarence. I was wondering what was keeping you. Your father has been having kittens." Admiral Lightning said, "Well, I did get held back again in another classic predicament involving Annie and Jake." Admiral Lightning and his mother arrive at the dining room table and his father said, "Eh, you are always getting yourself into all kinds of dangers." Admiral Lightning said, "Well, it is the only real job I was ever good at." Admiral Lightning's father said, "Dig in to my meatloaf." They all sit at the table where a platter of meatloaf rests.
